

Chinook Public Schools has joined Blaine County in using the AlertSense communication system. Our goal is to use the messaging system to communicate via text message to alert parents in regard to school closures due to power outages, snow or other weather related emergencies, as well as any other type of emergency we feel parents would need to be notified of immediately. If you wish to be notified via cellphone through the AlertSense communication system, go to the Chinook High School website www.chinookschools.org and click on the AlertSense link to enter the necessary information.

AlertSense provides emergency alerting and critical communication services that you can trust to be incredibly intuitive and always available. For over a decade, AlertSense has served a breadth of industries, including government, healthcare, education, utility, infrastructure, corporate, and not-for-profit.
